

dLAN® pro 1200+

1200

Up to 1200 Mbps transfer rate and range+ technology

LAN

1 x Gigabit LAN (MIMO Powerline)

PRO

Professional network management

Professional Powerline networking

The dLAN® pro 1200+ combines the highest-performance Powerline hardware (1,200 Mbps; range+) with professional software that provides numerous options for IT administrators.

High bandwidths of up to 1,200 Mbps, stable transfer rates up to 400 metres and sophisticated network management software make the devolo dLAN® pro 1200+ the perfect alternative for companies that cannot or do not want to route network cables. With the dLAN® pro 1200+, devolo ensures flexible network retrofitting over the electrical wiring. The fast and easy installation in conjunction with the dLAN® AVpro manager enables

efficient integration into professional networks. During this process, the dLAN® pro 1200+ provides a maximum transmission rate of 1,200 Mbps at a range of 400 metres. range+ Technology is one aspect that makes this possible. It allows all three lines in the electric mains circuit to be used for data transmission.

devolo
BUSINESS SOLUTIONS

dLAN® pro 1200+ Highlights:

- Data transmission at up to 1,200 Mbps
- Professional dLAN® Powerline adapter designed for commercial use
- Reliable network connections over the electrical wiring
- 1x Gigabit LAN port with Auto MDI-X function for connecting any number of network devices via patch cables
- range+ Technology from devolo: significantly better transmission thanks to optimised and patented signal coupling on the power line
- In addition to the phase and neutral wires, it also uses the earth wire for the best possible data rates and range
- Ensures a more stable Internet connection with much longer ranges
- Global remote access allows secure, web-based monitoring and configuration of all parameters remotely
- Status monitoring of the connected devices via integrated live view (transfer rates, data packets)
- Configuration of entire device groups via profiles in the dLAN® AVpro Manager
- Real-time monitoring of all dLAN® Professional network adapters
- Intuitive administration interface with beginner and expert mode
- Thanks to the integrated electrical socket, the power outlet (230 V / 16 A) remains available

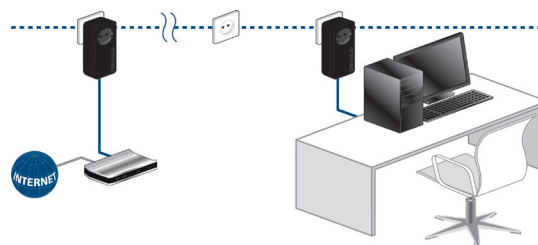

Single Adapter
Art.: 9557 (EU)

Starter Kit
Art.: 9561 (EU)

- A special mains filter attenuates the interference signals, ensuring an optimal and interference-free data transmission.
- Long range of up to 400 metres in buildings
- Security: 128-bit data encryption (AES)
- Short installation times and cost-efficient integration (without routing cables or drilling through walls)
- Professional network management software (dLAN® AVpro manager) for supporting the administrator during configuration and monitoring
- Supports flexible network architectures such as peer-to-peer or master-slave networks (multi-dwelling units)
- Business hotline and immediate replacement of defective products
- Engineered in Germany
- 3-year warranty
